

To the Owners of our Concrete Products,

Congratulations on the purchase of your new concrete products, made with love and care by Form Concrete Studios. We hope you enjoy them as much as we do.

Your concrete has been sealed using a high performance, concrete benchtop specific, hybrid polyurethane. Hybrid means that it is both penetrating and topical, maximising stain resistance while leaving a natural, low sheen finish that is completely food safe.

As with any sealer, our sealer will slowly wear overtime, particularly in high use areas, this can be minimised by following the tips below:

- **Regular waxing:** Supplied with your concrete is a benchtop specific wax. This wax adds protection to the sealer and will extend its life. The wax is easy to apply and should be done on a regular basis (we recommend every 2-4 weeks). Additional wax can be purchased directly from Domcrete.com.au
- **Clean with a warm damp cloth:** Use only mild detergent or a light vinegar solution if necessary. Refrain from using chemical cleaners, including "natural" or anything containing citrus or bleach. For marks such as permanent marker, spot cleaning can be done with isopropyl alcohol, using as little as possible.
- **Clean up any spills as they occur:** especially acidic kitchen spills and oil.
- **Do not cut directly on concrete:** This is just as much about keeping your knives sharp! Use a chopping board for cutting and a trivet for hot pots. This prevents excess wear and scratches on the concrete and sealer.
- **Anything left on the concrete for long periods can stain:** such as the oil bottle next to the stove, a pot plant, etc. Consider using a dish under them to avoid marks.
- **Treat your concrete with care:** All of our products are designed and made to withstand normal wear and tear in their new home. With a little care your concrete will look amazing for years to come.

Your concrete can be resealed when and if required. Please get in touch with us and we'll be happy to offer this service at our hourly rate.

Thanks Again,

The Form Concrete Studios Crew

Any questions, please don't hesitate to get in touch. Enjoy your new concrete product!
